ABOUTME

My professional journey has encompassed diverse roles: a landscape designer, a bartender, a head chef, and a restaurant owner. This allowed me to gain a wealth of experience in areas such as creativity, management, and building client relationships. Now, having taken my first steps into the world of programming as a future Full-stack Developer, I am directing my determination and passion towards learning to achieve success in this industry. I aim to leverage my acquired interpersonal skills and creativity in the process of solving computer-related problems.

SKILLS »

JAVA/Kotlin | HTML/CSS | Git/GitHub | Debugging | RESTful APIs | JavaScript | SQL | OOP

Fitly (link)
- a Java/Spring web application that individually selects optimal exercises and diet plans for logged-in users, utilizing algorithms tailored to their weight, height, age, and physical activity level
- this was a group project as part of the Junior Java Developer bootcamp at infoShare Academy, involving a team of five people
- JAVA | Spring | Thymeleaf | HTML/CSS | JIRA | GIT | JSON

Calculator (link)
- a calculator with basic functions, local memory, and a graphical user interface (GUI)
- JavaScript | HTML/CSS

Rock, Paper, Scissors (link)
- a simple game based on conditional logic with command input from the keyboard and score tracking in local memory; interactive responses depending on the progress of the gameplay
- JavaScript | HTML/CSS

Bug Buster Pup: Spooky Showdown (link)
- a 2D game with sprite animations and player state management; control a brave dog and defeat various types of monsters by transforming into a fireball to earn points. You have a set amount of time and only 5 lives, and each monster hit deducts points from your score
- JavaScript | HTML/CSS
